

Technologies of Humility | The Carr Center for Human Rights – Harvard Kennedy School

By Justice Matters

November 3, 2021

How do science and technology affect rights, equity, and justice? When are techno-solutions inadequate in addressing societal problems? In this month's episode of Justice Matters, host Sushma Raman talks with Professor Sheila Jasanoff, a pioneer in the social sciences exploring the role of science and technology in the law, politics, and policy of modern democracies. Join them as they discuss "technologies of humility," and how we might build more participatory methods of public policy problem solving.

Sheila Jasanoff is Pforzheimer Professor of Science and Technology Studies at the Harvard Kennedy School. Her books include *The Fifth Branch*, *Science at the Bar*, *Designs on Nature*, *The Ethics of Invention*, and *Can Science Make Sense of Life?* She founded and directs the STS Program at Harvard; previously, she was founding chair of the STS Department at Cornell.
